# RED EXPERT

Security Management Software

Need to standardize and automate your security procedures for consistent response to changing threat scenarios?

Get started today with RedEXpert Security Management Software.

Simple, Affordable, Reliable.

Designed by security experts for security managers, **RedEXpert** runs on your existing computers and requires no large investment or complicated infrastructure adjustments. Simple to install, simple to use, **RedEXpert** can fit the needs of security organizations of any size.

The system provides standard security procedures, step-by-step response plans,

automatic threat and readiness management and monitoring all in an open and configurable system.

With low ownership cost and powerful features, **RedEXpert** offers better visibility, accountability, preparation, and response, providing you with a solid management tool devoted to your Security Team.

## ADVANTAGES

- **Preparation**
  - Enforces site-specific standardized procedures and response plans
  - Automatically adapts security plans and readiness to threat level
- **Operational Awareness**
  - Enables individual or multi-site management through a convenient dashboard interface
  - Displays in-progress and historic events
- **Response**
  - Guides personnel through step-by-step responses
  - Incorporates response plans specific to medical emergencies, explosive detection, mass casualties, and more
- **Resolution**
  - Includes a detailed incident resolution process, and automatically generates reports for records and review
